New Places for Ayase Residents to Relax Are Open

Many people enjoy visiting a park for their health as well as for social interaction with others in the community. The third largest park in Ayase City, "Kanigatani Park" opened on April 23. It is located next to Ayase Water Purifying Facility in Yoshioka District with 3.3 hector of land.

Also, "Shiroyama Path," which was partially opened in April 2003, has been completed. All the route from Shiroyama Park to Community Sports Center is open now, providing Ayase residents with more places to go and relax.

Why don't you go out for a walk with your friends and family to enjoy fragrant fresh greens around this time of the year?

(1) Be prepared with two kinds of emergency kits for earthquakes. You should prepare a kit with "emergency take-out items" that you will take with you when you take refuge at a shelter during an emergency. You should also prepare a kit with "emergency stock items" that you will need to live after a quake.

② The emergency stock items should include at least a three-day supply of water, canned food, other non-perishable food items, etc. in case of emergency sheltering, cutoff of water supply and transportation, blackouts, etc. (Remember to replace expired items with new ones once a year.)

③ Keep emergency medicine and first aid kit, supply of clothing and underwear for the family, and rain gear ready. (Check expiration dates of medicine and replace with new ones when necessary)
